Election/Restrictions

1) Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-11, drawn to a semiconductor device, classified in class 257, subclass 548.
- II. Claim 12-15, drawn to a method of making a semiconductor device, classified in class 438, subclass 248.

2) Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the device of the Group I invention may be made by a process that does not require the trench isolation structure to comprise of an in-line portion compared to the Group II invention.

3) Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4) Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)
